Re: Docket #98N-1038 Irridation...food

Americans have indicated repeatedly their concerns about irradiated food: this means we need to KNOW if it's irradiated. Public Citizen's position on this is also my position, & their arguments are also mine.

We need clear honest labelling on our food. Do not remove our choice and force irradiated food down our throats.

Sincerely,

*I want to know what happens to my food
before it gets to me.*
